Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- Answer **all** questions.
- Answer the questions in the spaces provided
 - *there may be more space than you need.*
- You must **show all your working.**
- Diagrams are **NOT** accurately drawn, unless otherwise indicated.
- **Calculators may not be used.**

Information

- The total mark for this paper is 80
- The marks for **each** question are shown in brackets
 - *use this as a guide as to how much time to spend on each question.*

Advice

- Read each question carefully before you start to answer it.
- Keep an eye on the time.
- Try to answer every question.
- Check your answers if you have time at the end.

- 6 Here are five straight rods.

All measurements are in centimetres.

The total length of the five rods is L cm.

Find a formula for L in terms of a .

Write your formula as simply as possible.

$$\begin{aligned}
 L &= a-1 + 3a + a+4 \\
 L &= 5a + 3

- (a) Write down the coordinates of the point A.

(.....,)
(1)

- (b) (i) Plot the point with coordinates $(2, 9)$.
Label this point B . (1)

- (ii) Does point B lie on the straight line with equation $y = 4x + 1$?
You must show how you get your answer.

$$x = 2 \quad y = 4 \times 2 + 1 = 9$$

Yes, B does lie on line $y = 4x + 1$ (1)

- (c) On the grid, draw the line with equation $x = -2$ (1)

9 Jacqui wants to work out $3480 \div 5$

She knows that $3480 \div 10 = 348$

Jacqui writes $3480 \div 5 = 174$

because $10 \div 5 = 2$

and $348 \div 2 = 174$

What mistake did Jacqui make in her method?

She should have multiplied

348 by 2, not divided

- 10** Jake and Sarah each played a computer game six times.

Their scores for each game are shown below.

Jake	10	9	8	11	12	8
Sarah	2	10	7	14	4	10

- (a) Who had the most consistent scores, Jake or Sarah?

You must give a reason for your answer.

Jake. His range is 4 , and Sarah's range is 12.

(1)

Jake played a different game 20 times.

The stem and leaf diagram shows information about his scores.

Key
1 | 2 represents 12 points

Jake said his modal score was 6 points because 6 occurs most often in the diagram.

- (b) Is Jake correct?

You must explain your answer.

His modal score is 26, not 6.
He has not used the key
correctly.
